System Information	OUTDOOR	INDOOR
Manufacturer	_____	_____
Model #	_____	_____
Serial #	_____	_____
Age	_____	_____
Condition (1 best)	1 2 3 4 5	1 2 3 4 5

21 Point Furnace Inspection	21 Point Air Conditioning Inspection
1. Check Thermostat	1. Check Thermostat
2. Inspect Heat Exchanger	2. Lubricate Blower Motor
3. Check/Lubricate Blower/Circulation Pump	3. Check Filter System
4. Check Filter System	4. Check Contactor
5. Check/Clean Pilot/Flame Rod	5. Check Condenser Coil (when required)
6. Check Safety Controls	6. Check Compressor Operation
7. Check Heat Rise	7. Check Refrigerant Charge
8. Test for Carbon Monoxide	8. Check Coil Temperature Drop
9. Check Humidifier Damper Position	9. Check Humidifier Damper Position
10. Inspect Gas Piping	10. Check Condensate Drain
11. Inspect Venting System	11. Check Condensate Pump
12. Check Chimney	12. Check Chimney/Venting System
13. Clean Burners (when required)	13. Lubricate Condenser Fan Motor
14. Clean Blower (when required)	14. Tighten Electrical Connections
15. Clean Condenser (when required)	15. Check Capacitor
16. Clean Condensate Lines (when required)	16. Check Electrical Loads
17. Check Firing Rate	17. Inspect Evaporator Coil
18. Check Thermostat Cycling Rate	18. Clean Condensate Line (when required)
19. Check System Airflow	19. Check System Airflow
20. Locate/Identify System Switch	20. Locate/Identify System Switch
21. Infrared Camera Inspection (initial)	21. Apply Protective Coating
